Summary

Computer Science Engineering student with hands-on experience building AI-powered applications using Python, LLMs, FastAPI and Streamlit. Experienced in Generative AI, AI agents and NLP, seeking entry-level Software Development or AI/ML opportunities.

Professional Experience

AI Web Developer Intern - online, InAmigos Foundation 06/2026 – 07/2026

- Developed and integrated AI-powered web features using Python, APIs, and Generative AI.
- Worked on AI-based application development, testing, and debugging.

Education

B.E. Computer Science and Engineering, Sri Venkateswaraa College of Technology 2024 – 2028
CGPA : 8.25 Sriperumbudur

Skills

Languages: Python, Java, JavaScript, C
AI/ML: Machine Learning, NLP, Generative AI, LLMs, Prompt Engineering
AI Frameworks: Streamlit
Backend: FastAPI, REST APIs
Databases: SQL, Vector Databases
Tools: Git, GitHub, VS Code, Ollama
Concepts: RAG, AI Agents, API Integration

Projects

LLM Evaluation Harness  , Automated framework for evaluating and benchmarking LLM responses across multiple test cases. 09/2026

- Built a Python-based LLM evaluation harness using OpenAI API.
- Automated test execution and compared model outputs across multiple evaluation criteria.

AI Resume Intelligence  , AI-powered tool that analyzes resumes and matches candidate skills with job requirements using Python and LLMs. 10/2026

- Developed an AI-powered resume analysis application using Python, LLMs and Streamlit to extract candidate information and evaluate resume-job alignment
- Implemented Python-based processing and AI/LLM integration to generate structured candidate insights.

Achievements

- **Hackathon Winner — 2×** | Won 2 hackathons for developing and presenting technical solutions.
- **Hackathon Participant — 6×** | Participated in 6 technical hackathons.
