

SATHURIKA

ASPIRING AI ENGINEER

PROFILE

AI-focused engineering student building practical applications using local LLMs and agentic workflows. Experienced in developing full-stack systems and AI-driven tools such as a study planner using Ollama. Interested in solving real-world problems through intelligent automation and efficient system design.

PROJECTS & PRACTICAL EXPERIENCE

AI CONTENT GENERATING PLATFORM

Built an AI-powered content generation platform using Python, Streamlit, and the Gemini API. The application enables users to generate high-quality content for blogs, social media posts, marketing copy, product descriptions, emails, and more through an intuitive web interface. Leveraging Google's Gemini AI models, the platform delivers context-aware, customizable, and human-like content in seconds. The project demonstrates API integration, prompt engineering, user-friendly UI development, and real-time AI-powered text generation.

Resume screening AI

Resume Screening AI is an NLP-powered web application that helps evaluate how well a candidate's resume matches a specific job description. The project leverages Natural Language Processing (NLP) and Machine Learning techniques to analyze textual similarity between resumes and job requirements.

Agentic AI Study Planner (Intelligent Task Management System)

Developed an AI-powered study planner using locally hosted LLMs via Ollama to generate personalized study schedules. Designed logic for dynamic task breakdown, prioritization, and adaptive planning based on user input. Demonstrates practical use of AI for productivity without reliance on external APIs.

EDUCATION

- | | |
|-------------|--|
| 2020 - 2021 | Daniel Thomas Matric.Hr.Sec.School
SSLC - 71 % |
| 2023-2024 | Daniel Thomas Matric Hr.Sec.School
HSLC - 70% |
| 2024-2028 | Sri Venkateswaraa College Of Technology
BE.Computer Science Engineering - pursuing
CGPA - 8.2 |

CERTIFICATIONS

- Introduction to Generative AI
- Python basics from infosys springboard
- Introduction to Artificial Intelligence

SKILLS

Technical Skills

- HTML, CSS, JavaScript
- REST APIs , Gemini API
- Ollama (Local LLM Integration)
- UI/UX Design (Figma)
- Generative AI
- Machine Learning
- NLP

Soft Skills (keep minimal)

- Time management
- Communication
